## Determination of the Boundary in the Local Charzynski–Tammi Conjecture for the Fifth Coefficient

V. G. Gordienko, K. A. Samsonova

Saratov State University, Russia, 410012, Saratov, Astrahanskaya st., 83, valeriygor@mail.ru, kris-ruzhik@mail.ru

In this article we find the exact value of  $M_5$  such that the symmetrized Pick function  $P_{M4}(z)$  is an extreme in the local Charzynski–Tammi conjecture for the fifth Taylor coefficient of the normalized holomorphic bounded univalent functions

*Key words:* Löwner equation, optimum control, Pontryagin maximum principle.
