On the Class of Exponentially Growing Sequences that are Not Uniformly Distributed Modulo One

P. Z. Rakhmonov

Moscow State University, Russia, 119234, Moscow, Leninskie Gory, 1, parviz.msu@gmail.com

The paper presents a family of exponentially growing but not uniformly distributed sequences modulo one.

Key words: uniform distrubtion modulo one, Fibonacci numbers, golden ratio, homographic transformation..
